

Sean Lange

Tampa, FL | 727-218-4504 | seanlange74@gmail.com | github.com/seanlnge | seanlange.dev

EDUCATION

University of South Florida

Bachelor of Science, Computer Science

Tampa, FL
Expected May 2028

IBM Certified Professional Developer – Cloud v6

Cloud Infrastructure, Deployment Pipelines, Distributed Systems

IBM
October 2025

EXPERIENCE

G2 – Software Engineering Intern

Ruby on Rails, React.js, Docker, PostgreSQL, Git, Agile, Amplitude, Metabase, New Relic

Chicago, IL
June 2026 – August 2026

- Owned an A/B-tested review-form feature in Rails/React that generates targeted follow-up questions based on uncovered review topics, resulting in an **11% increase** in our review quality metric while maintaining review conversion rates.
- Shipped **production features** on G2's review platform, completing 10+ Scrum-managed tickets across UGC workflows.
- Collaborated with product managers, designers, and engineers to define scope, metrics, and iterate through **code review**.

Freelance – Software Development

TypeScript, JavaScript, HTML, CSS, Google Cloud Platform (BigQuery, Cloud Run, GCS), Firebase

Tampa, FL
March 2026 – June 2026

- Delivered production site for an **APM Consulting** client, owning scope, build, and deployment across 4-week engagements.
- Integrated an **AI-driven** presentation generation system into **FedCon's** internal platform, using an **agent loop** to reliably iterate on the design and content, streamlining sales presentation workflows for 12 sales advisors.

PROJECTS

Multyx.io | TypeScript, Next.js, PostgreSQL, AWS (EC2, ECS, Step Functions, VPC), Redis, Docker

February 2025 – January 2026

- Founded a multiplayer game development platform enabling beginner coders to build, test, and deploy real-time games.
- Migrated to **AWS ECS on EC2** instead of Fargate, enabling high-density multiplayer servers with granular control over the compute resources used for each game, resulting in a **43% reduction in hosting costs** for the deployment of game servers.
- Built a **Redis** caching layer to store game networking info, enabling a custom reverse proxy to connect users in **<2 seconds**.
- Engineered an **AWS Step Functions**-orchestrated provisioning pipeline to reliably build, deploy, and terminate per-game server instances, achieving **~40 seconds** between request time to live server.

Fitted | TypeScript, Next.js, Tailwind, PostgreSQL, AWS (S3, CloudFront), OpenAI Embeddings

April 2025

- Led a team of 4 to win AI track (1 of 50 teams) at HackUSF; shipped full-stack web app in 24 hours.
- Developed an **AI** outfit generation webapp on **TypeScript/React** with a type-safe tRPC API layer and **PostgreSQL** storage.
- Built a clothing embedding pipeline over wardrobe images, enabling a **sub-500ms semantic outfit matching** system.
- Deployed **AWS S3 and CloudFront** caching for scalable asset storage and delivery to reduce load times for clothing items.
- Established a **Git** branching strategy and onboarded teammates to use a new **TypeScript**-based stack.

Imgscrpr | TypeScript, MongoDB, Redis, REST API

October 2021 - February 2022

- Created and monetized a Discord bot added by 100+ servers, converting several users to a **paid tier**.
- Used **Typescript** and **Redis** to implement a rate-limit aware caching strategy, remaining compliant with Reddit API policies while supporting **100+ concurrent servers**, along with providing a **<2 second response time** to Discord chats.
- Implemented a Patreon billing pipeline, converting free servers with a **recurring-revenue** pricing model.

SKILLS

Languages

TypeScript, JavaScript, HTML/CSS, SQL, Ruby, Java, Python

Tools

React, Next.js, Tailwind, Node.js, Express, Flask, tRPC, Ruby on Rails, Astro, Docker, Firebase

Infrastructure

AWS (EC2, ECS, Lambda, S3, Step Functions, VPC), Google Cloud Platform (BigQuery, Cloud Run, GCS)

Data

Redis, PostgreSQL, MongoDB, Drizzle ORM, Prisma

Systems/Analytics

Metabase, Amplitude, AWS CloudWatch, New Relic, CI/CD, GitHub Actions
