

Sean Lange

Software Engineer

Tampa, FL | 727-218-4504 | seanlange74@gmail.com | seanlange.dev | github.com/seanlInge

SKILLS

Core Stack

TypeScript, React, Next.js, Node.js, tRPC, Git

Web Development

Express.js, Auth.js, WebSockets, Playwright

Infrastructure

AWS (ALB, EC2, ECS, Lambda, Step Functions, VPC), Docker, CI/CD

Data

PostgreSQL, Drizzle, Redis, MongoDB

EDUCATION & CERTIFICATIONS

IBM Certified Professional Developer – Cloud v6

Cloud Infrastructure, Deployment Pipelines, Distributed Systems

IBM

October, 2025

University of South Florida

Bachelor of Science, Computer Science

Tampa, FL

Expected May 2028

PROJECTS

Multyx – Multiplayer Game Development Platform – Founder

Founded a browser-based multiplayer game development platform enabling beginner programmers to build and deploy real-time games without networking knowledge.

- Designed a block-based visual programming model that eliminates shared mutable state, preventing race conditions for beginner users.
- Chose ECS on EC2 over Fargate to enable high-density, dynamically routed multiplayer servers, allowing a **43% reduction** in per-game hosting costs.
- Designed a typed AST model to enable editor-time validation and prevent invalid game logic before runtime.
- Built a Step Functions-orchestrated provisioning pipeline to reliably build, deploy, and terminate per-game server instances, achieving **~40 seconds** between request time to live server.

Imgscrpr – Adaptive Reddit Feed for Discord – Creator

Built and monetized a Discord bot added by **100+** servers, converting several users to a paid tier.

- Designed personalization logic through graph-based ranking algorithms to provide an adaptive Reddit feed.
- Utilized TypeScript to integrate the Discord and Reddit APIs, while using MongoDB and a caching layer to process and store server data.
- Reached unverified bot server-cap in a month; discontinued after hitting third-party data policy constraints.

Fitted – Outfit Generation Webapp – Creator

Led a team of 4; won AI track (**1 of 50**) at HackUSF; shipped full-stack web app in **24 hours**.

- Designed and built a full-stack outfit generation app using TypeScript, Next.js, tRPC, and PostgreSQL.
- Implemented AI-native clothing embedding and outfit creating tool with OpenAI embeddings and GPT-4o.
- Deployed scalable asset storage and delivery with AWS S3 and CloudFront.

WORK EXPERIENCE

Publix Supermarkets

Customer Service Staff

Largo, FL / Tampa, FL

March 2022 – Present

- Trusted with high-value money services (\$1000+ transactions) and end-of-day reconciliation.
- Coordinated teams of 10+ people, ensuring peak efficiency during varying traffic and peak hours.
